Nonevaluative summaries of the world's literature in psychology and related disciplines

PSYCHOLOGICAL ABSTRACTS

VOLUME 72, AUTHOR INDEX

JANUARY-DECEMBER 1985

Why can't they publish an abstract service tailored to my professional interests to save me time and effort?

They have.

It's the American Psychological Association's **PsycSCAN**, a series of inexpensive, subject-oriented publications with abstracts of the primary literature *in applied, clinical, and developmental psychology and in learning disorders and mental retardation (LD/MR).* PsycSCANs provide an overview of these fields so you can keep pace with new information and identify articles for further research—quickly and easily.

Each PsycSCAN publication covers one of the four areas, is issued quarterly (about 75 pages), and includes full bibliographic information. You get more than 1,500 abstracts in a one-year period in the discipline of your choice.

For LD/MR, abstracts are selected from the PsycINFO database taken from over 1,000 journals. The applied, developmental, and clinical PsycSCANs abstract *subscriber-selected* APA and non-APA journals. Every article in these journals will be abstracted and published in PsycSCAN. You'll vote for changes annually *as your professional needs change.*

PsycINFO

PA ***Psychological Abstracts Information Services (PsycINFO)* is a family of interrelated information services that provides access to the world's literature in psychology and related behavioral and social sciences in a variety of ways. *PsycINFO* consists of:**

Psychological Abstracts (PA) journal (ISSN No. 0033-2887). The comprehensive monthly compilation of nonevaluative summaries of the world's literature in psychology and related disciplines.

Issue. The monthly **PA** issues contain abstracts listed under 16 major classification categories, with some categories having subsections, as shown in the Table of Contents. Under each classification heading, the abstracts are arranged alphabetically by first author. Abstracts are numbered consecutively each year. The volume contains approximately 33,000 abstract records.

Indexes. An author and brief subject index appear in each monthly issue. A cumulated index of each is published in each third issue. An expanded and integrated annual index is published at the end of each volume.

Three-Year Cumulative Indexes To PA. Author and subject indexes for all entries in the **PA** journal for 1969-1971, 1972-1974, 1975-1977, 1978-1980, and 1981-1983.

PsycSCAN: Clinical Psychology. A quarterly publication containing abstracts from subscriber-selected journals in the area of clinical psychology.

PsycSCAN: Developmental Psychology. A quarterly publication containing abstracts from subscriber-selected journals in the area of developmental psychology.

PsycSCAN: Applied Psychology: A quarterly publication containing abstracts from subscriber-selected journals in the area of applied psychology.

PsycSCAN: LD/MR: A quarterly publication containing abstracts on learning disabilities, communication disorders, and mental retardation.

PsycINFO Retrospective: Mental Retardation (An Abstracted Bibliography, 1971-1980). A comprehensive 10-year review including abstracts on mental retardation.

PsycINFO Retrospective: Learning and Communication Disorders (An Abstracted Bibliography, 1971-1980). A comprehensive 10-year review including abstracts on learning disabilities and communication disorders.

The Thesaurus of Psychological Index Terms: 4th edition. A compilation of the vocabulary used in psychology and related disciplines as generated from the files of **PA**. The Thesaurus is divided into two sections: the *Relationship Section* and the *Rotated Alphabetical Terms Sections*.

PsycINFO Users Reference Manual: 1981 edition. Developed for the individual researcher of the information available from PsycINFO services, whether through use of the printed **PA** issues and indexes or by computer assisted search of the data base.

PASAR (PA Search and Retrieval). Retrospective search and retrieval service available through the PsycINFO office.

PsycINFO Database. Magnetic tapes of PsycINFO records to institutions for annual lease or license. Designed for use by information analysts and dissemination centers, the PsycINFO Database is also used for direct interaction by individuals through a computer terminal in their own facilities. This service is available through several dissemination centers throughout the world.

For more information on the above products, uses, and costs write to PsycINFO, American Psychological Association, 1400 N. Uhle Street, Arlington, VA 22201.

Psychological Abstracts (ISSN0033-2687) is published monthly for $600 domestic, $645 foreign (APA member price: $300) by the American Psychological Association, 1400 N. Uhle Street, Arlington, VA 22201.

Correspondence on copyright matters should be directed to the PsycINFO Permissions Department; back issue sales to the Order Department; and subscriptions and address changes to the Subscription Manager. All correspondence should be addressed to the American Psychological Association, 1200 Seventeenth St. N.W., Washington, D.C. 20036. For information regarding microform editions write to University Microfilms, 300 North Zeeb Road, Ann Arbor, Michigan 48106.

Address Changes must reach Subscription Servicing Department, APA, 30 days prior to the actual change of address. Copies undelivered because of address change will not be replaced; subscribers should notify the post office that they will guarantee second-class forwarding postage. **Other Claims** for undelivered copies must be made within 4 months of publication. Address your claims to Subscription Manager, APA.

Subscriptions are available on a calendar-year basis only (January through December).

ERRATA: In this volume, all authors (or editors) whose work was abstracted or cited in ***Psychological Abstracts*** for the period of January-December 198 are listed alphabetically by surname. However, corrections were made to several authors/editors' names during the proofreading cycle. As a result, some names no longer appear in strict alphabetical order. For easy reference, each name out of order is listed below, along with the author name that precedes it and the index page on which the citation appears.

1985 COVERAGE LIST

The *Psychological Abstracts* Coverage List includes journals and other serial publications that are scanned regularly and abstracted selectively. The presence of a serial title in this list does not imply that all articles contained in issues of that serial will subsequently appear in *Psychological Abstracts*. Journals likely to publish articles relevant to behavior are included for a regular, systematic scan of their content. Articles are specifically and individually selected based on their relevance to psychology.

Whenever possible, publisher name, address, frequency of publication, ISSN, and CODEN are included for each publication to facilitate access to original documents by users. The date in parentheses indicates the publication year of the first issue scanned by *Psychological Abstracts* of a particular serial. Asterisks within parentheses indicate that coverage by *Psychological Abstracts* began with the first issue of the publication. Bold type identifies those journals that published articles appearing in Volume 72.

This Annual Author Index contains over 55,000 references to the authors and editors of approximately 33,000 abstract records published in the 12 monthly issues of *Psychological Abstracts* from January 1985 through December 1985. A companion work, the Annual Subject Index, references these records by topic.

In this volume, all authors and editors whose work was abstracted or cited in *Psychological Abstracts* for the periods indicated are listed alphabetically by surname. However, the Author Index is intended to be a name index only and not a person index. "Adams, P." will be listed separately from "Adams, Paul," even though the names may refer to the same person. Two listings for "Adams, P." may also refer to two different authors. Due to variation in the representation of names that exist in source documents, alternative locations should be consulted. As many as four authors may be listed per selection. If there are more than four, the first author is listed followed by "et al." Primary entries consist of author name(s), the title of the selection, the language of the selection (if foreign), a citation of the original source document, and the *Psychological Abstracts* abstract number under which the entry appeared. All secondary authors are cross-referenced to the primary entry, and the abstract number in *Psychological Abstracts* is printed as well.
